Ther TUES. JAN. 1, 1918 Wea

Another new year has begun
How will it end?

It has been another
cold day, clear & bitter
but not as cold as yesterday.

I have, of course, been
in the house, but I am
getting on nicely.

I was up by 10 A.M.
& I have been busy all day.

Wrightson Scudder called
this P.M. and later Mr.

Sprague. It was so kind
of him to come from
Boston.

May Dexter is still feeling
very poorly, but is im-
proving. I sent her
roses to-day. Miss Brown
attended to it.

Several phone talks.
Some letters written.
I want to get through
the Xmas letters.

Mrs. Strong called to-day -

but improving.

Busy writing letters
and doing some book-
work. - Iain Brown
finished Spartina -
I am about $\frac{1}{3}$ through
Carex.

Dr. Robinson called
this evening. Yesterday
I corrected local flora
proof, and I went
over it with Dr. Rob-
inson. It will make
a very good paper on
Rosaceae. We sat
by an open fire in
the parlor -

Ther THURS. JAN. 3, 1918 Wea

Cloudy raw & cold

In the house as usual
no getting out in this
weather

Withers Scudder came
up this morning and
gave me the card for the
next play - During the
day with Miss Brown's help
I got out the notices
which were rather elaborate
and I also wrote out my
Ann. Rep. for the Sh. Ass'n.
I have been Secy now for 35 yrs.

George called this P.M. &
said Miss Richardson came
out and that took half
the afternoon.

I hope that tomorrow
I can walk out a bit if
only the weather will abate
a bit. It's eating up a little.

May Deylin still is pretty
uncomfortable. May feel
the effects of a cold.

Ther

FRI. JAN. 4, 1918

Wea

Clear & cold but improving

In the A.M. I got out
the Shakespeare notices
with Miss Brown's help
rather I did this yesterday
& sent them of this A.M.
I was busy on Shakespeare
work during the A.M.
p & bills & wrote letters.

Half after dinner
George called
Ray & Mr. and Galen
Lyon & Reuben & son. They
talked a while of the A.M.

Miss Hammond also called
Worked in my herb
in the afternoon
also in the evening

I am getting on
nicely physically &
slept. got out when
the cold abated.

May Dexter is
I have improving.
Red Rand called at 5:30

Ther

SAT. JAN. 5, 1918

Wea

Clear, moderating.

Wrote letters this morning. Jennie called in the A.M. and also Charlie Batfield. Charlie told me all about the Botanical Club meeting of last evening. I was glad to get details. Hubbard's talk on N.E. genera of grasses was carefully done, though very dry. Charlie brought a small package of plants that I went over this evening and named for him.

This P.M. I had a short talk after my nap, with J.R. Churchill. Arthur Nichols called & a little later Laura Kelsey & her sister. We had a very nice talk indeed.

Ther

SUN. JAN. 6, 1918

Wea

Clear, much milder, calm
Still cool & bracing.

I am still improving.
This morning I was
bundled up and I took
a walk on the boards
between here & the brick
block a few times.

It was good to get the air.

This morning Mill Bremer
called & we had a good talk.

This afternoon I had
calls from Mr. & Mrs. Paton,
Mr. Lane & his little daughter
Hollis Larrabee, Charlie
Batchelder (for some plants),
and George & Mary!!
It was very nice to see
them.

I had my $\frac{3}{4}$ hr. rest after
dinner.

Evening spent quiet
writing letters. Called up Marion
and on her suggestions. A
nice talk.

Ther

MON. JAN. 7, 1918

Wea

Cloudy, chilly, some sun.

I have been in all day and have not felt up to the mark. The old feeling of oppression. Still I have kept pretty busy, writing Christmas notes, going over my Carices and reading with stereoscope a few Palestine chapters. This method of study is a very vivid and real one. To me the views are very remarkable and impressive.

Cloudy, pretty cold, a little
sun at noon.

Today I have felt better,
especially from noon.

I have worked in Camp
today. Miss Brown is
making good progress
with the grasses, clean,
& fortifying.

At noon I took a slow
walk to the polo's and
voted. It was refreshing
to be out, but very sleep-
y. I walked very
slowly.

Charles Salomonson called
this P.M. for my signature
to a paper in re Kuttall
Dues to members engaged
in war work.

This evening I went
over a few more Palestine
views - wonderfully interesting.

I have nearly finished
my Christmas letter.

Ther

WED. JAN. 9, 1918

Wea

Sun & cold, bracing, cold
I have been out
twice to-day. This morning
I walked as far as Buck-
ingham St. & this afternoon
I walked up to Lucy's and
got to write Mary & Lucy
for about an hour. That
feels well. May it continue.
I am feeling better.

I have made progress
in Carey to-day and
a few days will see me
through. Miss Brown has
got pretty nearly through
her mince. She does the
house work, fortifying
plants & cleaning sheets
if necessary -

My Xmas letters are written
and that is a relief.

I am down this time as
and I feel that it does
a much good -

Ther THURS. JAN. 10, 1918 Wea

Sun and cloud, cool.

This morning Miss Brown & I went by electric to the Harvard Trust and I removed everything from the two boxes in the vaults and we went back to Harvard Sq. where I deposited the important papers in the box at the Charles River Trust. I am pleased to have done this. Everything is now near at hand. Then we returned in time for lunch.

This afternoon I rested and did some work on Carey in the Herbarium. I also worked on the accounts, the Estate, my own affairs and the various tax papers require time. Evening quietly at home talked with J.R.C. & Miss Thorp Scudder, &c. &c. did a bit of reading.

Ther

FRI. JAN. 11, 1918

Wea

Clear, cloudy in evening, breeze.

This morning worked on Carey
at 11. A.M. I walked to Harv. Sq.
& business in the bank, had my
hair cut &c. Home by electric
This is my longest walk so far.

After dinner worked some
more on Carey and then walked
up to Mary's and sat write
in George for some time.
He dreamed rather fully
the man. Income Tax,
I had papers. It will be
simple in my case.

This evening Miss Brown & I
worked in herb. I have done
a lot of pigeon holes & Carey
& she finished the
Gramineae, cleaning and
folding the sheets. I examine
each one after her. I have
previously this season been over
all these sheets, for cut sheets
&c. I'm very busy the Herb.
will be in fine shape -

SAT. JAN. 12, 1918

Wea

Pouring rain before 8 Am. with high wind. Then clearing & wind settling down. The day clear & very mild, the snow & ice melting and running off in torrents.

I have done a good deal of work in my Herbarium & to basins Brown. I have 3 more pigeon holes in Carey's box.

This noon I walked from 12:15 to 1:15 as far as the Auburn bridge. The gutters were mountain brooks.

I had a long talk over the phone with Mrs. Ticknor. John is slowly recovering from his very severe illness pneumonia in both lungs with pleurisy. I shall call on him as soon as I can. Knowlton called on me this P.M. He had been at the Gray Herbarium Local Flora -

Ther

SUN. JAN. 13, 1918

Wea

Clear, light wind, bitter cold -

I have worked when at home on *Carex* and have finished and connected with the rest of the book. I have reviewed now the whole herbarium. In *Gramineae* & *Hyperaceae* the nomenclature is down through Rhoads, 1917. There should be now no 2 states represented on one sheet!! Miss Brown is nearly through *Gramineae* & then she does *Cyperaceae*, cleaning & fortifying. I feel much satisfied. I will 2 books to Robert Rantone who is 11 yrs old today.

Took a short walk in Van Rantone at 12.30. Then I dined at the Brewster at 1.30. Jack Limer, ambulance driver on the Franklin front was there. He showed us German & French helmet gas masks, Shrapnel shell etc. etc.

Clear, cold & bleak.

This morning I walked over to the Gray Herk. with the car & box of cut sheets!

They all were glad to see me and I enjoyed my morning. I settled 2 or 3 names with help from Fernald and Robinson. I came back with Dr. Robinson and took with me the last mounted sheets for Miss Anderson.

This P.M. I checked up all my summer's work and all the sheets are in order and also those plants brought me.

I have worked on them

This P.M. & evening. I shall keep apart what Lindeau wants to see.

My herbarium is in good shape now. Miss Brown is rapidly getting the last sheets into good condition. Still she has all Carey to do.

Howling blizzard on awaking, clearing a little later, the day becoming clear and cold. Sun in the early morning.

General herbarium work much of the day. Also worked on papers & pamphlets in my study. Telephone couldn't work in Am. Went to the Rantouls twice to phone.

This evening auto'd to Phillips Brooks House to Annual Meeting of the Shakespeare Club. It was particularly successful. Play first part of Hamlet. Good cast, Mr. Soome. Talked for some $\frac{3}{4}$ hr. on Hamlet's mental condition especially in the first part of the play, before the murder was generally known. 28 members present. I reached home by 10.50. I have stood the day well

Clear, calm, bracing.

Spent much of the afternoon Shakerpeare work

Also called on Mary Dexter, Lucy, & Mary & Grace. Mary is pro-

gressing steadily & slowly. This afternoon I got the Shakerpeare notices ready to print. Miss Brown did the rest.

I had 3 callers this afternoon - Grace Williams, her sister, & a young girl friend. They are staying till Sunday at 8 Church. Long St. Boston. I must call in Saturday.

I have gone over a number of covers that Miss Brown has done in Cyperaceae. We say we shall be done with Carex. I have some through Carex. Then what?

Cloudy all day with a little snow about noon. Cool.

This morning I had a talk over the phone with Bro. H. Brown in regard to writing a list of books on Handel for the Club. I called on him at 11.30 at his school, and settled it, and this afternoon & evening I printed it and got the list ready to mail tomorrow. It has been quite a work.

I have also finished reading Peter Schlemihl, a most remarkable story. Miss Brown has done much work on Cyperus and by Saturday will have done to Carey, Case 2!! It is such a comfort to feel that my sheets are in such fine condition. The work is practically done with Carey. Various reviews there

Some sun, more cloudy
air mild -

This morning worked in
my study. At about
noon walked to Harr. Sq.
to Bank, etc. Then went
to Boston and visited the
Franklin & the Provident
Inst. & got books balanced.

Then called on A. C. Sprague
and we walked over the
Common and had lunch
at Cook's. We had an in-
teresting talk.

After lunch we walked
up to Mrs. Mrs. Hovey's cor-
ner of Mt. Vernon & Willow Sts.
where I made a very
pleasant call indeed.

They have taken the apart-
ment for the winter & it
enables Mr. Hovey to get to
his business more easily. He
is quite crippled with rheumatism.
Home by 5.30. Geo. called. Evening at home.

Sun & cloud, & we snow, mild
evening clear & cold.

I have been at home
all day. This. Aft. & Pm.
I have been working
over my pamphlets, pho-
tos & books. Much to do
in organizing -

This evening Miss Teacher
& Stephen & Frank came
in at 7.45 and we spent
the evening looking at
& some of my 1917 Shel-
burne plants. I showed
them in an easel in
the reception room. The
light was just right and
all enjoyed the display
and the talk. I thought
it a pity to put away
the plants if I could
first give any pleasure.
They certainly do look
very well when mounted
and put under a light.

Clear, cold, walking very slippery -

This morning I went over to J. R. Churchill's for the day. Electric to Broadway. S. Burtin!! First trip that way. Subway fr. Haver Sq. to Broadway, 13 min!!

Then surface car to Dr. Church. I found Anna at home, after quite a break-down at Boerum Hospital. Over work, German measles & long hours in her isolation she must rest quite a while.

The day passed quickly. The Judge & I worked on our barbarians, and made good progress. Home by 10.30 in a little less than one hour.

I do not mention the tennis war in my diary. It is not the place. It is overpowering in every possible way -

Cloud & clear sky - Cold.

I staid at home to-day
working on various things
I mailed a package of plants
sent by Charlie Batchelder.
I also studied the tax
papers, not easy.

This afternoon Mary
came down and I gave
her an exhibition of my
last year's Steelbush
plants, on the porch.
She was very much
impressed. I explained
the story of the ♂ & ♀
fl., the fruit & the
vegetative parts of the
Red Pine &c. &c.

This evening I
went to the Nuttall
Club. 12 + 1 present
Charlie Townsend read a
paper of much interest on a
Cano Boat at Ipswich, ^{estimated} 12000.
More in last quarter & future (good)

Cloudy snow began to fall
at noon - mild.

This morning I went
to Lucy's to do an errand for
her. May is improving slowly.
Dr. Treble came before 9 AM
I walked to Haver, Sq. and
enjoyed, left my Infirmary
watch at Colburn's. It is no good.

They will do something
to Boston to State St. street
Depot for Lucy. Then to
J.R.C.'s. He had just arrived, &
Mrs. Bride had just called.
The three went out to
Marston's & lunched to-
gether. Very pleasant.
Then J.R.C. went to his
office & we two to Cain
Bride.

Evening at home,
writing letter mailing.

Mrs. Dease (sister) there and
walked some way with her
afterwards. Then I called
on Grace & Helen Williams
at 79 Brattle St. & took them
to the Widener Library
where we all enjoyed every-
thing immensely. Mr. Winslow
showed his section, and I handled
the 1st folio of Shakespeare (\$20,000⁰⁰)
We have showed us the stack

This morning I worked on my pamphlets, and had a nice call from Hal Kennedy. His father is very erratic. It is sad. He has hallucinations constantly.

Mr. McBride came over to lunch. We had a good talk. I walked back with him to the Herk. We looked up my *Shepherdia Mayosoides*.

It is *M. Sylvatica*, common in cultivation & a growingly common escape.

The rest of the day has been spent in my Herk. Mr. Brown has begun on *Carex acris* in the 2nd pipe hole.

Charlie Batchelder called me up on some *Stachys* specimens.

I went over to Alice.
Wetherbees and lunched with
Mr. Wetherbee & Alice. It
was very pleasant. I had not
seen Alice for a long time.
I had a good talk with
Alice. She is 15 last Dec. 16.
and is growing fast. It is
sad that Mrs. Wetherbee
has died. Alice needs
her so much.

I spent some time reading Lewis' "Genesis of Hamlet". It is intensely interesting. One must read slowly & repeatedly to get the argument. A thorough knowledge requires a long study of the many conditions of the times, and of the preceding plays, 1648, German Hamlet etc. etc.

I went up to Sarah's & May's to supper. I spent the entire evening there.

This morning I called at the Brewsters, and saw Fannie who said Will was rather discouraged though better. I think he has my trouble. Then I called on Lucy & May and had a good talk. As I left Mrs. Washburn was passing, and I was introduced to her and walked a short way with her.

This afternoon I visited Scudder in the Shakespeare and at 4.30 J.R.L. came out and I staid till after 10. At 5 C.C. Sprague came and we three staid together. After dinner Sprague went in to the Symphony. The Judge & I had a good evening. Talking over the disposition of his herbs, and we looked over some plants he brought especially Violets. I shall send a few to Grained to identify. Hybrid I guess.

Anxious news from the front!!

Charlie Batchelder for about
 $\frac{1}{2}$ hr. through Watertown
Newton, W. Newton Brookline
The air was fresh and it
did me good -

This afternoon I called
on Dr. & Mrs. V. & had
a very lovely time with
them. This evening I called
on the Deacons & saw
them & heard of Mr. Frank,
Eliot & Spaldin called on
me after tea and we
had a very good talk.
I learned much of his life.

Dr. Robinson called
before tea & we had a talk
over F.D.'s health &c
Bro. called after P.M. but
I was out -

I am much better
to-day -

Cloudy, chilly

I have staid in the house to-day owing to the weather. I was not feeling up to the mark this morning, this is slow business.

I have read and did some work in the Herald nearly through Umbelliferae.

Emily Chapman called this evening - Mrs. Pease called this afternoon. I was very glad to see her -

Yesterday I wrote to Dr. Brainerd & did up a package of projects that R.C. gave me for - Sanx bow. leaves to Dr. B's flat. I shall mail them to-morrow.

Dr. Kennedy is failing fast. He is confined to his room & has 3 men nurses. He will not eat. Poor man. May the end come.

Before Appalachian Club

Herbert W. Gleason, a member of the Appalachian Mountain Club, entertained fellow members last night at Huntington Hall with an illustrated talk on "Mt. Rainier National Park."

In company with Stephen T. Mather, director of the National Park Service, Mr. Gleason made a week's horseback trip around Mt. Rainier last summer, following a newly completed trail for more than a hundred miles. He took many pictures along the way and these were used in the course of his lecture. The wild flowers which he showed by the use of colored slides were remarkable.

*Cambridge Tribune -
March 2, 1918 -*

On Sunday evening, at 8 o'clock, there will be a mass meeting in aid of the New England Italian War Relief Fund, under the auspices of the Committee of Twenty-one of the old Cambridge Churches. Miss Amy Bernardy, of Florence, Italy, a representative of the Italian government, will speak.

Miss Bernardy is the daughter of Spirito Bernardy, who was vice-consul in Florence for 30 years. She taught the Italian language and literature at Smith College for six years, at which time she often spoke before the Dante Society of Boston. She has been throughout the United States as a representative of the Italian government in the interest of its immigrants. She has also been a volunteer inspector, sent by the Italian government, of the mountain schools of Italy, established in the reclaimed districts by the soldiers. She has described this work in her Transcript letters. She is known through Italy as "la vaporina," or "Little steamboat," because of her energetic work in behalf of Italians. She, at her own villa, is taking care of 86 children, many of whom have no mothers, and whose fathers are at the front. Miss Bernardy, while she is here, will speak at the Twentieth Century Club, and at a great Italian mass meeting in Boston.

William Roscoe Thayer, a friend of Italy, and a well-known writer of Italian history, will introduce Miss Bernardy. Rev. Henry Santorio, of Christ Church, Boston, will speak in English, Rev. Filotes Tagliatela will speak in Italian, Signora Tagliatela will sing Italian songs, and there will be young women ushers in Italian costumes.

STUDENT OF BOTANICAL RESEARCH

George Golding Kennedy Was Native of Roxbury, Graduate of Harvard, and Last Year Presented His College with Herbarium of His Own Collection

George Golding Kennedy, who of late years had become widely known as a New England botanist, died last night at his home, Blue Hill avenue, Milton, in his seventy-seventh year. Mr. Kennedy was born in Roxbury, and his father was Dr. Daniel Kennedy, who gained a wide reputation through "Kennedy's Medical Discoveries." His mother was Anne (Colgate) Kennedy. Mr. Kennedy studied at Harvard and was graduated in the class of '64. He then studied at the Harvard Medical School and got his degree from there in '67, and it was then that the botanical and scientific world opened to him a fertile field for research. He identified himself with his father's business until 1900, when he retired and thereafter devoted his time to botanical research, being one of the founders of the New England Botanical Club. He was a member of the visiting committee of Gray's Herbarium at Harvard and was a member of the Union, St. Botolph, Boston Art and Harvard clubs. Last year he presented to Harvard an herbarium, to the collection of which he had devoted a long time.

Mr. Kennedy's wife was Harriet White Harris. She died in 1910. The four surviving children are Mrs. Edith Golding Briggs of Brookline, Dr. Harris Kennedy, Sinclair Kennedy and Miss Mildred Kennedy, all of Milton.

The collection has been turned over to the United War Work campaign and all contributions of visitors are to be devoted to this purpose.</p> </div> <div data-bbox="114 834 867 1546" data-label="Text"> <p>The collection is owned jointly by the Liberty Loan Committee of New England and T. L. Gill, and consists of many hundreds of specimens of battle-scarred paraphernalia, ranging in size from the rifle cartridges picked up on many fields of notable strife to the great 105 mm. guns captured from the Germans, the French 75 mm., said to be the most destructive war engine in the world; various models of French and German howitzers, mortars and field pieces, and, in short, specimens of all arms which have been used in the present war. Each has its interesting history, and, covered with the mud and scars characteristic of the field from which it was taken, leaves but little of the horror of frightfulness to the imagination of the observer.</p> </div> <div data-bbox="114 1536 867 1822" data-label="Text"> <p>Besides these guns there are bullet and shell-torn airplanes, aero bombs, sea depth-bombs, mines, shrapnel and bullet-punctured helmets and war-worn uniforms of all the forces which have been identified in the struggle, each of which tells its own pathetic story of the fate of the wearer.</p> </div>

A model of a Flanders trench, representing an eighty-yard front line and 250 yards of first and second-line defences, scaled to an inch to a yard, is one of the most interesting features and is alone worth a visit to the exhibition. It was built by a Canadian engineer and nothing has been omitted that would make it an exact representation of the trenches in which the soldiers of the American Expeditionary forces fought. Wire entanglements, craters, dugouts and trench holes are all there as well as the hundred and one minor fittings of the ditches in which the allied soldiers lived.

Every stage in the evolution of gas defense and attack is strikingly illustrated together with the liquid-fire tanks used by the Germans and the torpedoes used in their submarine warfare.

Several times daily Sniper Louis Lance and Sergeant Jack Golding of the Dublin Fusillers, two of the few men of their organization who lived to come back, tell of their thrilling experiences during the first year of the war.

The exhibition is in charge of William E. Chamberlain, assisted by Howard V. Bullinger. About \$4000 has already been contributed by visitors for the United War Work fund and it is expected that this will be increased many fold during the remainder of the time that the collection can be kept here.
